

TURN OFF YOUR TV

"... the media can convince the people that the war on terror is real..."

Centralized mainstream media and the invention of the television has created the most devastating weapon of mass destruction mankind has ever known. All of our major news agencies are now owned by only a handful of extremely powerful, multinational corporations who only seek to increase their control and profits. This system severely threatens freedom and democracy around the globe. Wars are now fought and sold to the public by limiting and controlling your access to information. Research shows our brains go into a trance-like stupor as we watch television. Our children are losing their intelligence and creative spark. Our minds are slowly being poisoned by propaganda, lies, and advertisements, to distract us from the true problems in the world. Fear, distraction, separatism, violence, sexuality, and materialism are the drugs being fed to you. Don't believe the hype. It's time to wake up and learn the truth.
